Right on Target

Why Choose Arrow?

Arrow Powder Coating specializes in medium to large production runs, but gladly accepts small and individual jobs as well. We can coat almost all metals, excelling in steel and aluminum.

We have documented salt spray test results, city test results, and customer testimonials to show that we are the best in the business and environmentally friendly. We constantly monitor our equipment and quality during our processes; whether it is verifying the settings on our washer, ovens, or powder guns, to checking powder cure and thickness, to inspecting packing.

You can be assured of a top quality product. EVERYTIME.

Due to our huge in-house stock of powders (various colors, RAL's, gloss levels, textures, metallics, primers, top coats, and effects) along with locally stocked suppliers, we can receive, coat, and return parts quicker than our competitors.

We are conveniently located in downtown Indianapolis, just east of the of the I-65/I-70 split.

ARROW IS THE ANSWER!!

In today's business, a company needs every advantage it can utilize to stay ahead of the competition. Whenever that "I need it now" order comes through, know that Arrow can provide the fastest turn times.

Arrow can easily handle a 5000 piece order, a single prototype order, or anything in between. Combine this with our custom quoting software and you can be confident of the best value for your dollar.

We strive to make our customers look good.

Conveyor Process

Arrow Powder Coating's process includes:

- 430' conveyor line
- Iron phosphate pre-treatment washer
- 30' dry-off oven

- Iron phosphate pre-treatment
- Dry-Off oven
- One person powder booth
- Cure oven

Part Capability of 96" W x 96" H x 240" L, 6000 lbs

WHAT IS POWDER COATING?

Powder Coating is a process in which powder is applied to metal and is heated until the powder hardens and forms a durable, attractive coating. Literally any color, gloss, and texture is available with usually a single pass application. It is often the preferred finishing method of many fabricators. Many everyday items are powder coated. Here are just a few of these items:

Furniture, mailboxes, fences, filing cabinets, bicycle frames, sculptures, cars, appliances, railings, lawn mowers, basketball goals, brackets, posts, shelving, hinges, benches...and more!

Durable Finish

- Resistant to Corrosion
- Resistant to Peeling
- Resistant to Cracking
- Resistant to Impact

Attractive Finish

- No Drips
- No Runs
- No Sags
- Wide selection of powders

Protects the Environment

- No Solvents
- No Hazardous Waste
- Requires Little Energy

Economical

- Low Energy Expenses
- Low Waste to Dispose
- Little Manpower is Needed
- **Low Expenses means Low Prices!**

MAKE YOUR PRODUCT STAND OUT!!
